Volume 20

Aghili, Farhad, Martin Buehler, and John M. Hollerbach. Design of a hollow haxform torque sensor for robot joints [20:12] pp. 967–976.

Aicardi, Michele, Giorgio Cannata, Giuseppe Casalino, and Giovanni Indiveri. Cusp-free, time-invariant, 3D feedback control law for a nonholonomic floating robot [20:4] pp. 300–311.

Andreff, Nicolas, Radu Horaud, and Bernard Espiau. Robot hand-eye calibration using structure-from-motion [20:3] pp. 228–248.

Aufrère, R., F. Marmoiton, R. Chapuis, F. Collange, and J. P. Dérutin. Road detection and vehicle tracking by vision for adaptive cruise control [20:4] pp. 267–286.

Austin, David J., and Brenan J. McCarragher. Force control command synthesis for constrained hybrid dynamic systems with friction [20:9] pp. 753–764.

Banks, Jasmine, and Peter Corke. Quantitative evaluation of matching methods and validity measures for stereo vision [20:7] pp. 512–532.

Berretty, Robert-Paul, Ken Goldberg, Mark H. Overmars, and A. van der Stappen. Trap design for vibratory bowl feeders [20:11] pp. 891–908.

Biographies of new editorial board members [20:1] pp. 4–5.

Blind, Sebastien J., Christopher C. McCullough, Srinivas Akella, and Jean Ponce. Manipulating parts with an array of pins: A method and a machine [20:10] pp. 808–818.

Canny, John, and Eric Paulos. Optimal probing strategies [20:8] pp. 694–704.

Cherif, Moëz, and Kamal K. Gupta. Global planning for dexterous reorientation of rigid objects: Finger tracking with rolling and sliding [20:1] pp. 57–84.

Chiu, Yu-Jen, and Ming-Hwei Perng. Forward kinematics of a general fully parallel manipulator with auxiliary sensors [20:5] pp. 401–414.

Collins, Steven H., Martijn Wisse, and Andy Ruina. A three-dimensional passive-dynamic walking robot with two legs and knees [20:7] pp. 607–615.

Corke, Peter, Al Rizzi, and Sanjiv Singh. Editorial: Multimedia editors' introduction [20:7] p. 511.

Corke, Peter, Alred Rizzi, and Sanjiv Singh. Editorial to announce introduction of multimedia [20:3] p. 187.

Cortés, Jorge, Sonia Martinéz, James P. Ostrowski, and Kenneth A. McIsaac. Optimal gaits for dynamic robotic locomotion [20:9] pp. 707–728.

Crétual, Armel, and François Chaumette. Application of motion-based visual servoing to target tracking [20:11] pp. 878–890.

Crétual, Armel, and François Chaumette. Visual servoing based on image motion [20:11] pp. 857–877.

English, James D., and Anthony A. Maciejewski. Failure tolerance through active braking: A kinematic approach [20:4] pp. 287–299.

Featherstone, Roy. The acceleration vector of a rigid body [20:11] pp. 841–846.

Feliu, V., A. García, and J. A. Somolinos. Gauge-based tip position control of a new three-degree-of-freedom flexible robot [20:8] pp. 660–675.

Fujita, Masahiro. AIBO: Toward the era of digital creatures [20:10] pp. 781–794.

Galicki, Mirosław. Real-time trajectory generation for redundant manipulators with path constraints [20:8] pp. 676–693.

Gavrilets, V., E. Frazzoli, B. Mettler, M. Piedmonte, and E. Feron. Aggressive maneuvering of small autonomous helicopters: A human-centered approach [20:10] pp. 795–807.

Han, Inhwan, and Sang-Uk Park. Impulsive motion planning for positioning and orienting a polygonal part [20:3] pp. 249–262.

Hashtrudi-Zaad, Keyvan, and Septimiu E. Salcudean. Analysis of control architectures for teleoperation systems with impedance/admittance master and slave manipulators [20:6] pp. 419–445.

Herr, Hugh M., and Thomas A. McMahon. A galloping horse model [20:1] pp. 26–37.
